Conference recording system	Landscape lighting	IP PA system	Distributed management platform	LED screen

- Recording
- Remote control
- Executive meeting
- Fire broadcast
- Sound system

- Remote discussion
- Outdoor LED Screen
- Discussion and speech
- Camera tracking
- Paperless conference system

Relevant departments

Leader

Secretary

Network administrator

PART 02

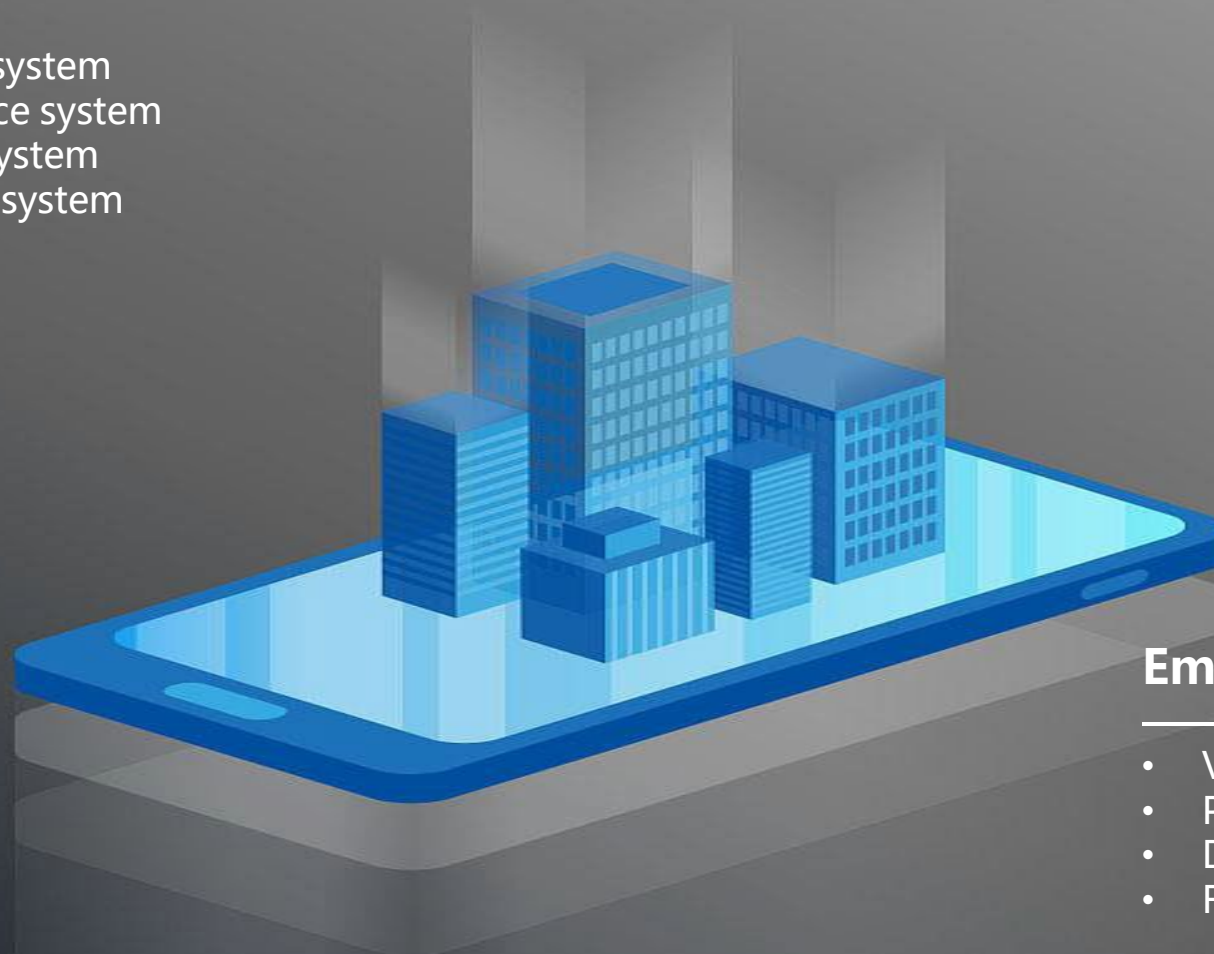

Solution

Executive meeting room

- Digital conference system
- Paperless conference system
- Video conference system
- Professional sound system

Building

- IP PA System
- Landscape lighting
- LED screen

Auditorium

- Fine spacing LED
- Stage lighting
- Professional sound system
- Digital conference system

Emergency meeting room

- Visual management system
- Professional sound system
- Digital conference system
- Fine spacing LED

PART 03

Product Introduction

PART 03-1

Executive meeting room

Deployment of executive meeting room

Fine spacing LED screen

- Seamless display
- HD full color

HD recording system

- Meeting recording
- Online sharing

Professional sound system

- Full frequency loudspeaker
- Daily sound reinforcement

Paperless conference system

- Paperless Conference
- Data sharing
- Efficient office, command and dispatch

Video conference system

- Remote conference and training
- HD display

Visual management system

- Centralized control of all equipment
- Power off/on with one button
- Audio and video signal interconnection

Digital conference system

- Hi Fi pickup
- Camera tracking

Digital Conference System:

- Digital conference microphones are deployed in seats, a variety of meeting modes effectively keep the order of speeches, make meetings more efficient
- The super long pickup distance of conference microphone can meet the needs of daily leaders' speech and sitting posture, and realize the functions of check-in, voting, conference service, etc

service

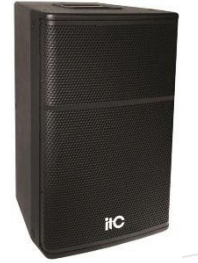

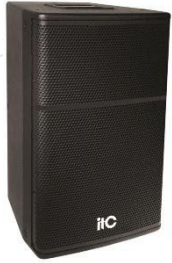

Electronic
nameplate

Voting

Professional Sound System

- By using EASE software to simulate the sound field analysis, the optimal acoustic environment solution can be obtained;
- The precise sound field design ensures that the conference sound field is evenly distributed, and the sound is clear and distinguishable. No matter where the participants sit, they can hear the high fidelity sound quality

screen reading

Data Center files are displayed on the same screen

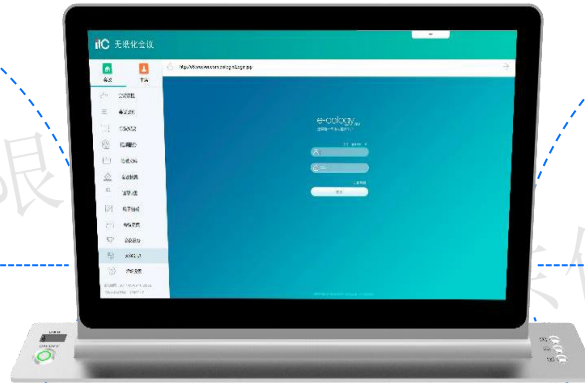

Screen scheduling

Signal dispatching, information release

Large screen control

Picture sent to large screen

Paperless system

Video viewing

- Remote live picture retrieval and viewing
- Access and view the monitoring screen

Voting

Quick voting of decision-making scheme

Electronic whiteboard

Interactive handwriting for training and communication

Video Conference System

Highlight of Video Conference System

- In the meeting, electronic whiteboard, document sharing, file transmission and other applications are realized, and the working ability of each post is improved through remote training

Screen of different venues

Meeting document screen

- After the meeting, you can also save the meeting process recording, convenient for participants to review and new employees to learn

Conference live online

PC client

Phone client

Pad client

Staff of various departments watch the live broadcast of the conference online through the mobile client, learn the spirit of the conference and communicate the reception policy, and video conference is not restricted by regional places

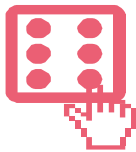

One-key control

Video switching

Volume adjustment

Power switch

Curtain lift

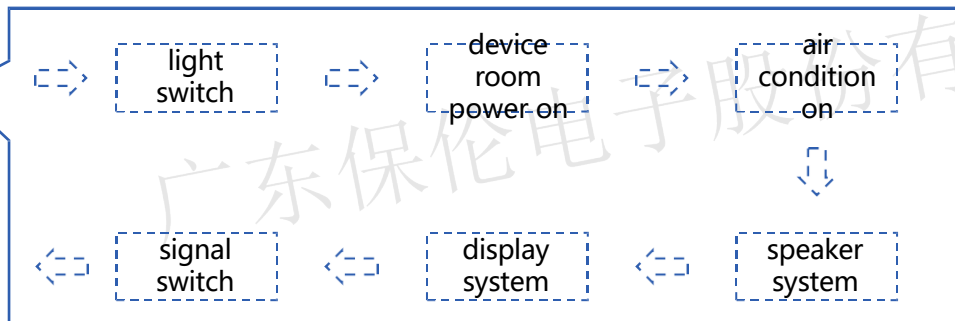

Light switch

Curtain closed

PART 03-3

Government Lecture Hall

Lecture hall system deployment

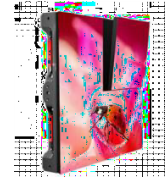

Digital conference system

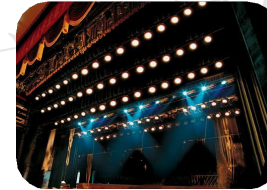

Professional sound reinforcement system

Stage curtain system

Video display system

Stage lighting mechanical system

Video conference system

Recording living system

Small pitch LED display

- Feel free to customize the size
- Automatic brightness adjustment
- Environmentally friendly mute design

- Life time up to 10W hours
- P0.9-P2.5 multiple pitches optional

Rostrum

- Maintain the order of speaking in the multi-functional hall
- Wireless deployment, easy to use wiring, unlimited places

Performance mic: for hosts' speech, mobile use

Conference mic: for important sessions, symposiums use

Reporting mic: for personnel interviews and leaders' speech use

Professional Sound System

Highlight:

- A variety of speakers can be used to meet the needs of various types of sound reinforcement in the lecture hall
- Long projection distance, high sensitivity and strong penetration
- Sound clarity, sound direction and natural
- Professional acoustic design analysis, designing suitable speaker placement

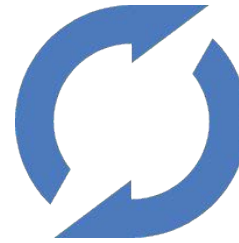

Entertainment mode

- The beam lights make the stage beautiful, the interaction between the main and auxiliary lighting, rendering the atmosphere
- Meet the needs of government agencies, festivals, anniversaries, awards ceremony performances

Conference mute mode

- High-brightness and ultra-quiet conference without flicker and glare
- Can meet the needs of the government to hold joint meetings, summary meetings, party committee spiritual education meetings, etc.

PART 03-3

outdoor area application

Building appearance

- Landscape lighting
- Area lighting

Government hall

- The LED bar
- Information Release

Indoor and outdoor

- Public broadcast

Internal area public broadcast

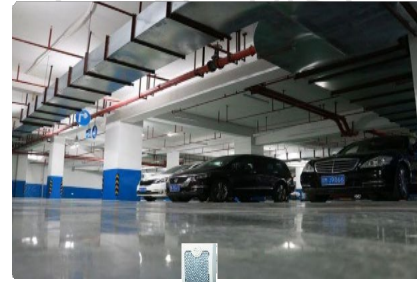

Government Affairs Service Hall (Waiting Area)

Wall-mounted terminal/ceiling speaker

Office area

Cabinet terminal + ceiling speaker

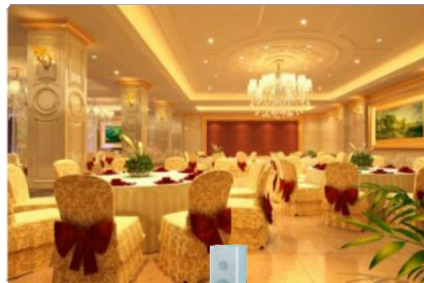

Building parking lot

Cabinet terminal + wall-mount speaker

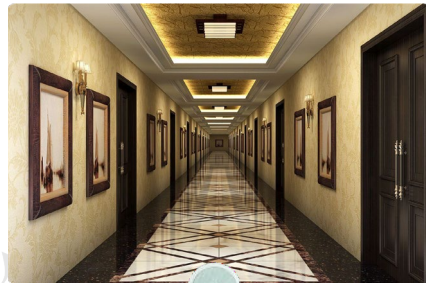

Display area

Wall-mounted terminal/ceiling speaker

Restaurant

Cabinet terminal + speaker

Building corridor elevator

Cabinet terminal + speaker

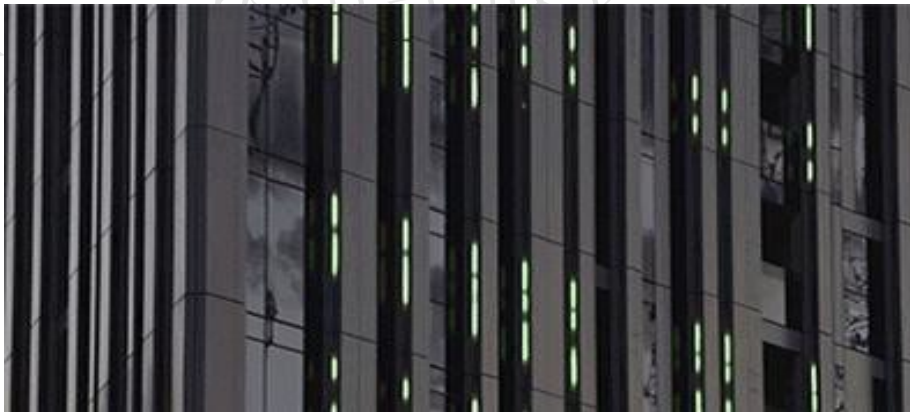

Service consulting front desk Third-party docking (fire fighting/monitoring)

Sub-controller + sub-control microphone

Dry contact interface

Landscape lighting system

- The lighting of the building allows the government to create an image of the building in the night skyline, so that the building forms a focal point from a distant perspective, increasing the sense of building sequence
- Aiming at the national emblem and other sign lighting, it reflects the solemnity of government agencies
